

IMHOGEN LTD

TIER 1: CUSTOM ENGINEERING & FACTORY SOLUTIONS INTAKE

This consolidated form serves as the Master Intake for all Product and Process Engineering requests. Information provided here acts as the Single Source of Truth (SSOT) for the project lifecycle.

1.0 CLIENT INFORMATION (SSOT GENERATOR)

Organization / Client Name

Contact Person & Title

Email Address

Phone Number

Physical Address / Project Site Location

2.0 PROJECT SCOPE & CLASSIFICATION

What scale of engineering support are you looking for?

- ☐ **Product Design:** I need a specific custom machine or product designed.
- ☐ **Process / Factory Design:** I need a complete processing line or factory infrastructure.

Project Title / Name

Primary Objective / Problem to Solve

3.0 SYSTEMS ENGINEERING CORE

Define the fundamental engineering operands of the system.

INPUTS: Material (Raw material type, density, condition, moisture, etc.)

INPUTS: Energy & Information (Available power supply, required data/sensors)

TRANSFORMATION: What exactly must happen to the raw material?

OUTPUTS: Final Product & Target Throughput (e.g., 500kg/hr)

BY-PRODUCTS: Waste streams that must be managed

4.0 OPERATIONAL ENVIRONMENT & CONSTRAINTS

Human System (Expected operator skill level?)

Active Environment (Space limits, indoor/outdoor?)

Budget Expectations / Constraints

Target Delivery Timeline
